

## Lab Sheet 05 – Identify fail-points/blockings in the key-user flow(s)

IT19143828 Munasinghe M. A. S. S.	01 Fail-points/blocking	02 Fail-points/blocking
<b>Fail-points/blocking</b>	When open the application it displaying login page. There isn't separate option for the registration. User has to click "Forgot registration" button and get register. But it's difficult to identify to a non-technical person.	In the home page there are all the tasks that all the users have complete. It would be better if user has to select the user type (Admin, teacher, accountant) while the registration and displaying the home page with the relevant functions according to the user type.
<b>Evidence</b>		

IT19220048 Jayasekara D.D.K.G	01 Fail-points/blocking	02 Fail-points/blocking
Fail-points/blocking	Error messages are not displaying properly – In the mark test interface, some error messages are displaying without submitting the application.	After once login to the application, if user close the application by mistake, he has to log again by using user credentials. That may occur to waste the time.
Evidence		<p>Interview 1 –  <a href="https://web.microsoftstream.com/video/ecfcab2-1e21-48e2-9eafed1c807140f3">https://web.microsoftstream.com/video/ecfcab2-1e21-48e2-9eafed1c807140f3</a></p> <p>Timeline : 7.10 – 7.38</p>

IT19099132 Rajakaruna R.W.P.C	01 Fail-points/blocking	02 Fail-points/blocking
<b>Fail-points/blocking</b>	There is page called custom queries. It is for delete class, delete students, delete images and execute queries. It would be better if there are separate delete button in relevant pages without having one page to complete all the delete tasks.	Long load times – After clicking a button from the home page, system takes some time to load the relevant interface.
<b>Evidence</b>		<p>Interview 2 – <a href="https://web.microsoftstream.com/video/4100b0c3-5ac8-4114-ad1ef7b570aeca23">https://web.microsoftstream.com/video/4100b0c3-5ac8-4114-ad1ef7b570aeca23</a></p> <p>Timeline: 3.38 – 3.58</p>

IT19204062 Chamudini H.A.N.	01 Fail-points/blocking	02 Fail-points/blocking
<b>Fail-points/blocking</b>	All operation in one interface - In the student interface and the staff member interface there are multiple operations to complete. Those are generating barcode, import/export and add new.	When adding new students, user has to always add one student by one. So, it takes a very long time if user need to add many students at once.
<b>Evidence</b>
